phase delay of the line (Claim 12) or to maintain a constant phase delay (Claim 23).

Also, the prior art does not teach a fluid channel having a serpentine configuration coupled to a transmission line with a fluid dielectric being at least one of being added and removed from the channel to selectively vary the coupling to vary the phase delay of the line (Claim 1). Furthermore, the prior art does not teach a fluid channel having a serpentine configuration coupled to a transmission line with a fluid dielectric being at least one of being added and removed from the channel to maintain constant the phase delay of the line as the operational frequency is varied (Claim 11).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
